Professional Profile

Software Development diploma graduate with project experience in C#, ASP.NET Core, REST APIs and database deployment. Familiar with React and code-first development principles, with knowledge of software quality assurance and unit, stress and Selenium testing. Work Integrated Learning has provided exposure to business analysis and project management. Seeking a junior software development opportunity.

Technical Skills

Programming languages C#, Kotlin, Java, JavaScript, PHP, SQL and Bash; Python (working knowledge); object-oriented and structured programming.

Backend and APIs .NET 8, ASP.NET Core, MVC, dependency injection, RESTful API development and integration, HTTP/JSON, ASP.NET Core Identity, JWT authentication and role-based access control (RBAC).

Databases SQL Server, Entity Framework Core, Room Database, PostgreSQL, Oracle SQL and MongoDB; relational database design, ERDs, normalisation and deployment; familiar with code-first development principles, with MySQL exposure and PL/SQL fundamentals.

Mobile and desktop Android (Kotlin), MVVM, XAML, Material 3, ViewBinding, Retrofit/OkHttp and Firebase Authentication; familiar with WPF.

Web and AI integration HTML5, CSS3, responsive web design and LLM API integration; familiar with React.

Software quality and testing Software quality assurance and testing principles, unit testing, stress testing, Selenium browser testing and input validation.

DevOps and tools Azure DevOps, Git/GitHub, GitHub Actions, Dockerfile configuration, Linux/SSH and Cloudflare Tunnel; Visual Studio, VS Code, Android Studio, NetBeans, EPPlus and iText 7.

Microsoft Office Word, Excel, PowerPoint and Access.

Work Integrated Learning

Academic software projects | IIE Rosebank College

- Gained familiarity with Business Analyst and Project Manager responsibilities through collaborative software project work.
- Developed an understanding of requirements analysis, project planning and team coordination within the software development lifecycle.

Selected Software Projects

CyberAware | C#, ASP.NET Core 8, JavaScript, Docker

- Developed a cybersecurity awareness web application with chat and health API endpoints, dependency-injected services and optional external API integration.
- Implemented input validation, request rate limiting and fallback responses when the external service is unavailable.
- Included nine automated knowledge-routing checks and a multi-stage Dockerfile for the .NET 8 application.

GitHub repository

Kayak Database Management System | Oracle SQL and PL/SQL

- Designed four related tables with primary and foreign keys; wrote joins, reporting views and a PL/SQL cursor to process records.
- Modelled customer, kayak and upgrade records, with an ERD and scripts demonstrating database user privileges.

GitHub repository

FocusFlow | HTML5, CSS3 and JavaScript

- Built a responsive productivity dashboard with task management, notes, browser local storage and summary analytics.

GitHub repository

Education

Diploma in Information Technology in Software Development

IIE Rosebank College, Pretoria Campus | Completed | NQF Level 6

Selected results Advanced Databases 99%; Work Integrated Learning 3A 88%; Web Development (Intermediate) 85%.

National Senior Certificate

Sonrise Christian School | 2023

Leadership and Additional Credentials

- IIE Rosebank College Mentorship Programme, 2025: Certificate of Appreciation for participation.
- SkillsPro Group End-User Computing Starter Competency Certificate, 2021: completed with distinction; Access, PowerPoint, basic IT and internet modules.
- School Prefect, Sonrise Christian School, 2023.
